- headless ghost display emulator
- Laptop Compatible
- desktop & GPU compatible
- supported phone compatible
- DisplayPort (DP) connection
- usb c | type c connection
- IT Technician Tool
- 4K 60Hz virtual display support
- DDC / EDID support
- Compact Portable Adapter

PRODUCT DESCRIPTION

- Need a small display emulator for headless laptop, desktop PC, or mini PC testing? This DOONJIEY DisplayPort (DP) virtual display adapter works as a dummy display plug to simulate an external monitor connection.
- Supports 4K display emulation up to 60Hz on compatible devices, making it ideal for display testing, remote desktop setup, screen detection, and headless system operation.
- DDC / EDID support allows compatible systems to recognize a virtual monitor signal even when no physical display is connected.
- Compact dummy plug design makes it easy to carry, install, and use without requiring cables or bulky adapters.
- Suitable for desktops, workstations, GPUs, and other devices with DisplayPort (DP) output.
- Useful for technicians, remote workstation users, IT support, developers, and anyone needing stable virtual display recognition.
- ⚠ Important: Your device must have a DisplayPort (DP) output for this adapter to function.
- ⚠ Actual supported resolution depends on the device, graphics card capability, operating system, and display settings.
- ✅ Advantage: Small size + 4K 60Hz support + EDID display emulation = reliable solution for headless display and remote setup use.

Best For

- IT Technicians
- Desktop & GPU Display Testing
- Headless PC / Workstation Setup
- Remote Desktop Users
- Computer Repair Shops
- Developers & System Admins

ADDITIONAL SPECIFICATIONS

- Product Type: DisplayPort (DP) virtual display adapter / dummy plug
- Brand: DOONJIEY
- Connector Type: DisplayPort (DP)
- Display Function: Headless Ghost Display Emulator
- Signal Support: DDC / EDID Display Emulation
- Resolution Support: Up to 4K @60Hz on Compatible Devices
- Usage Type: Virtual Display, Headless Setup and Remote Desktop Support
- Compatible Devices: Desktops, GPUs, Workstations and Devices with DisplayPort Output
- Setup Type: Plug and Play
- Size: Compact Portable Adapter

- Best Use: Simulating an External Display Without Connecting a Physical Monitor
- Important Compatibility Note: Device Must Have DisplayPort (DP) Output
