Aluminum Body

Nylon Braided Cable

## PRODUCT DESCRIPTION

- Need to connect extra HDMI screens to your laptop or desktop setup? The Lemorele HD10 MST Hub Docking Station helps expand your display connection using USB-C or USB-A input on compatible devices.
- Comes with 2 HDMI output ports, allowing you to connect two external monitors, TVs, or projectors for office work, presentations, multitasking, trading setup, teaching, and productivity.
- Triple display support means you can use your laptop screen together with two external HDMI displays, depending on your device, operating system, graphics support, and display mode.
- Designed for both Mac and Windows users, but display behavior can vary depending on the laptop model and system support.
- Built with an aluminum body for a cleaner, more durable, and professional look.
- Braided cable design helps improve cable strength for daily office, home, and travel use.
- Useful for users who need a cleaner multi-screen setup without buying a full-size docking station.
- ⚠ Important: For video output, your device must support display output through USB-C, USB-A display mode, or the required driver/chipset depending on the setup.
- ⚠ On macOS, multi-display behavior may be limited depending on the Mac model and MST support. Some setups may mirror displays instead of extending them separately.
- Advantage: 2x HDMI output + USB-C/USB-A support + aluminum body + braided cable = professional multi-display expansion for work and productivity.

Best For

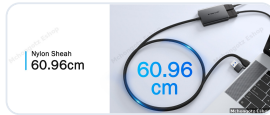

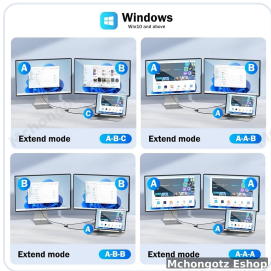

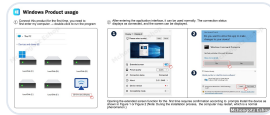

- Dual Monitor Setup
- Laptop Workstation
- Office Productivity
- Trading / Data Monitoring
- Teaching & Presentations
- Projector Connection
- Programmers & Developers
- Home Office Setup
