PRODUCT DESCRIPTION

- Need to display the same screen on multiple monitors or projectors without using extra computers?
- This 4-port VGA splitter helps you share one VGA signal to up to four displays, making presentations, training sessions, and shop display setups much easier.
- Its 150MHz bandwidth supports smooth signal distribution for standard VGA display needs, making it a practical choice for offices, schools, and business environments.
- This is the right choice if you want one source shown on multiple screens at the same time.
- It is not suitable for showing different content on each screen, so it is best for mirrored display setups only.

Best For

- Offices running the same presentation on multiple screens
- Classrooms and training rooms with VGA monitors or projectors
- Shops, reception areas, and counters needing repeated screen display
